MT542 – Deliver Free

The instruction is used

- to instruct the delivery of financial instruments free of payment to the counterparty
- to request a cancellation of a previously sent deliver free instruction
- to pre-advise on a deliver free instruction
- to hold or release. a deliver free instruction
- to instruct an internal transfer between an account owner's own sub-accounts

In case of internal transfer there is no need to send the MT540 for matching purpose, the instruction will be settled automatically.

Message functions: NEWM; CANC; PREA

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

MT541 – Receive Against Payment

The instruction is used

- to instruct the receipt of financial instruments against payment from the counterparty
- to request a cancellation of a previously sent receive against payment instruction
- to pre-advise on a receive against payment instruction
- to hold or release a receive against payment instruction
- to instruct **the receipt of a repo settlement** from the counterparty (repo settlements that are not settled until the end of the trading day will be automatically cancelled during the end of day procedures)

Message functions: NEWM; CANC; PREA

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

Status	Tag	Field Name	Content/Option	KELER's criteria
Mandatory Sequence A General Information				
M	16R	Start of Block	GENL	-
M	20C	Sender's Message Reference	:4!c//16x	-
M	23G	Function of the Message	4!c[/4!c]	PREA -This is a preadvice of an instruction. It is used for matching purposes. Without further notice from the account owner, not binding for execution. It is also used to hold an instruction with release status. PREA may not be used for Repo settlements. NEWM -New message. KELER only provides the settlement in case of "NEWM" It is also used to release an instruction with hold status. CANC -This is a request to cancel a previously sent instruction.

MT543 – Deliver Against Payment

The instruction is used

- to instruct the delivery of financial instruments against payment to the counterparty
- to request a cancellation of a previously sent deliver against payment instruction
- to pre-advise on a deliver against payment instruction
- to hold or release a deliver against payment instruction
- to **instruct the delivery of a repo settlement** against payment to the counterparty (repo settlements that are not settled until the end of the trading day will be automatically cancelled during the end of day procedures)

Message functions: NEWM; CANC; PREA

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

Status	Tag	Field Name	Content/Option	KELER's criteria
Mandatory Sequence A General Information				
M	16R	Start of Block	GENL	-
M	20C	Sender's Message Reference	:4!c//16x	-
M	23G	Function of the Message	4!c[/4!c]	PREA -This is a preadvice of an instruction. It is used for matching purposes. Without further notice from the account owner, not binding for execution. It is also used to hold an instruction with release status. PREA may not be used for Repo settlements. NEWM -New message. KELER only provides the settlement in case of "NEWM" It is also used to release an instruction with hold status. CANC -This is a request to cancel a previously sent instruction.

MT548 – Settlement Status and Processing Advice

The message is used to advise real time the status of a settlement instruction:

- successful receipt of a settlement instruction;
- rejection of a settlement instruction;
- acknowledgement of settlement cancellation instruction;
- settlement instruction status report (sent each time the status of a settlement changes);
- notification on wrongly formatted MT549 instruction.

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

End of Block (GENL)	:16S:GENL	

MT535 – Statement of Holdings

The message is used to report the securities holding of the account owner at a given time.

The report is sent automatically with the following periodicity depending on demand:

- at the end of each trading day
- on a specific day of the week (weekly)
- on the first or the last trading day of the month (monthly)
- and can also be requested via MT549 any time during the day.

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

This message is sent only if the balance (at 93B) is not equal 0!

MT536 – Statement of Transactions

The message is used to report the securities transactions of the account owner during a given time period (one day).

The report is sent automatically with the following periodicity depending on demand:

- at the end of each trading day
- on a specific day of the week (weekly)
- on the first or the last trading day of the month (monthly)

- The report can be requested in two ways: only if there was any transaction on an account involved
- even if there was no transaction on the accounts

The main usage of the instruction complies with the SWIFT standards. KELER specific field usage is detailed below, including mandatory/optional status and contents.

Message flow

Step	Message Type	Sender	Event
1.	MT530	KELER's partner	Transaction processing command is sent to KELER.
2.	MT548	KELER	Settlement status and processing advice is sent to advise the status of the transaction.

Example

SUSPENSION - OTC prompt transactions

The accountholder (account code: 0346) sent an OTC transaction to the KELER, which not settled still. The Bank did not want to delete the unsettled transaction, but wanted to get out from the daily transaction processing, therefore sent an OTC SUSPENSION instruction in an MT530 SWIFT message (EER/530/4/F/0217), with reference of the first sent OTC transaction.

Filed Name	Format	Explanation
Start of Block (GENL)	:16R:GENL	
Sender's Message Reference	:20C::SEME// EER/530/4/F/0217	
Function of the Message	:23G:NEWM	
Safekeeping Account	:97A::SAFE// 0346-001000	
End of Block (GENL)	:16S:GENL	
Start of Block (REQD)	:16R:REQD	
Reference	:20C::PREV// EER/543/0217/2/E	
Indicator	:22F::SETT//NPRE	
End of Block (GENL)	:16S:REQD	

Example

SUSPENSION FOP TRANSFER transactions

The accountholder (account code: 0346) sent a FOP TRANSFER transaction to the KELER, which still not settled. The Bank did not want to delete the unsettled transaction, but wanted to get out from the T. daily processing, therefore sent an FOP TRANSFER SUSPENSION instruction in an MT530 SWIFT message (EER/530/1/P/0217), with reference of the first sent OTC transaction.

Filed Name	Format	Explanation
Start of Block (GENL)	:16R:GENL	
Sender's Message Reference	:20C::SEME// EER/530/1/P/0217	
Function of the Message	:23G:NEWM

Attachment B

List of status and error codes in MT548

Notice:

In a first line all instruction are inspected, the fields are checked whether their contents meet the criteria given in this user guide or not. If not, an MT548 with rejected reason will be sent back specifying the field tag of the incorrect field. All other error codes are specified below.

General status codes for RVP, DVP, Repo and FOP instructions

N.	Previous status		Status		Settlement date	MT548 message sent to the buyer							MT548 message sent to the seller
