 Model2
 Model3
 Not applicable
 OTHER:

413 G12Q007
Please briefly describe your settlement process, including how do your settlement procedures vary from the model chosen above?

PFMI: Q.12.1.3
AGC: 48a

No difference from standard models. Note: Model 1 for off-exchange (OTC) settlements, Model 3 for CCP-cleared on-exchange cash market settlements.

In case of OTC settlements CSD participants' instructions require matching and settlement occurs on a gross basis, on a trade by trade basis. The delivery of the securities requires the successful transfer of funds from buyer to the seller which triggers the immediate and unrevocable transfer of the securities. (DVP principle)

In case of the CCP-cleared on-exchange trades the netted delivery and receipt settlement instructions (per ISIN) are sent by KELER CCP to KELER CSD in an already matched status. The delivery instructions should be settled first (from the participants accounts to KELER CCP) and the daily net countervalue of all trades will be debited in one sum from the clients' accounts to credit the CCP. Once the netted amounts are successfully debited KELER CCP initiates the net credit funds transfer in favour of the participants. (All security receipts per ISIN and all amounts due.)

KELER prepared its formalized Business Continuity Plan (BCP) with consultancy and quality assurance from KPMG Hungary Ltd. With the preparation of the BCP KELER had the following goals:

- To ensure the continuity of business operations in case of undesirable events.

- In case of any disruption in normal business operations, to resume operations within the shortest possible time at the lowest possible cost. The cornerstone of our BCP is the in-depth analysis of the potential risk factors and their possible effects on the operation of the company, based on which the critical business processes and their supporting resources were defined. In order to manage extensive crisis situations, a back-up site was set up in 2004, which serves as an alternative site for operations and an alternative workplace for staff if the operations can not be continued at the prior site. Data are replicated real-time in the back-up site. Business Continuity Plan (BCP) ensures the expected business continuity in case of incidents, partial stops or crisis. In the event that KELER is unable to provide the service supported by alternative means in accordance with its BCP or in case the Clients' co-operation is required KELER notifies Clients without delay. KELER communicates updates primarily via e-mail to both network management and operations contacts. The latest BCP-Disaster Recovery Plan (DRP) testing of KELER's back-up site workstations and most of its business processes was carried out by KELER on 25 October 2016. The real life disaster recovery test was carried out successfully, clients were using KELER's services without any problems and the test did not substantially influence day-to-day operations. BCP and DRP regulations, and recovery plans are regularly (1 year period) reviewed, tested and updated, as well as audited by external parties (supervisory institutions and auditing organisations).

AGC members from time to time receive requests from their direct investor-clients for an informational copy of a CSD's completed questionnaire. Such requests typically lead to interactions between personnel at the CSD in question and member personnel or client personnel, or both. Those interactions take time and impose costs on both members and depositories. Do you approve of AGC members delivering a copy of your completed questionnaire to the member's direct client in response to the client's request?
