- OTHER:

412 G12Q007

Please briefly describe your settlement process, including how do your settlement procedures vary from the model chosen above?

PFMI: Q.12.1.3

AGC: 48a

No difference from standard models. Note: Model 1 for off-exchange (OTC) settlements, Model 3 for CCP-cleared on-exchange cash market settlements.

In case of OTC settlements CSD participants' instructions require matching and settlement occurs on a gross basis, on a trade by trade basis. The delivery of the securities requires the successful transfer of funds from buyer to the seller which triggers the immediate and unrevocable transfer of the securities. (DVP principle)

In case of the CCP-cleared on-exchange trades the netted delivery and receipt settlement instructions (per ISIN) are sent by KELER CCP to KELER CSD in an already matched status. The delivery instructions should be settled first (from the participants accounts to KELER CCP) and the daily net countervalue of all trades will be debited in one sum from the clients' accounts to credit the CCP. Once the netted amounts are successfully debited KELER CCP initiates the net credit funds transfer in favour of the participants. (All security receipts per ISIN and all amounts due.)
