

13 reasons, why it's worth to choose KELER

Market participants shall be able comply with their reporting obligations stipulated by REMIT solely through an RRM (Registered Reporting Mechanism). As an RRM, KELER offers its reporting service to all market participants to submit reports on their own trades or a third party's trades, on standard and non-standard contracts (including orders) as well.

KELER can be the partner of both domestic and regional market participants in this process. As a reporting agent, KELER has gained its considerable experience by offering its reporting service in terms of EMIR (European Market Infrastructure Regulation) obligations too, which makes KELER the ideal choice for an easy and quick delegation of REMIT reporting activities.

KELER's Trade Reporting system has been developed by KELER itself originally to manage all types of reports under EMIR. The same system has been further upgraded now to meet the needs of our clients with REMIT reporting obligation too. The greatest advantage for our clients is that they shall be able to report under EMIR and REMIT with a sole connection, in a customary environment. It will be the participants' own interest to review how much more cost- and time efficient it would be to delegate reporting by selecting one single service provider to manage their overall reporting obligations.

Advantages of KELER's reporting services:

1. **Cost efficient:** only one, monthly membership fee shall be applied by KELER, irrespective of
 - the type of the energy product traded;
 - the type of the deal: power exchanges deals or OTC;
 - the quantity of reported deals.
2. **Safe:** KELER TR complies with the latest security requirements thus ensuring that data remain confidential.
3. **Online:** web-based interface guarantees an easy and fast access.
4. **Offers help-desk support:** KELER supports clients in meeting reporting obligations and resolving technical issues with a continuously operating helpdesk.
5. **Fast:** Reports can be uploaded directly through the interface or through a web-service option that enables automated reporting.
6. **Practical:** KELER TR allows market participants to delegate the reporting of both their own trades and their counterparties' trades to KELER.
7. **Provides alternative options:** With an indirect membership those who delegated their reporting to a third party who subscribed to KELER's service shall be able to monitor the progress of the reporting activity taking place on their behalf.
8. **Manageable:** The current status of uploaded reports and confirmations received from ACER can be constantly tracked in KELER's system.
9. **Reliable:** In case of a wrong report, confirmation contains the error's description, which helps avoiding the same mistakes in the future.
10. **Easy to handle:** In case of uploaded reports, it is possible to set various filtering options, and to download results into Excel documents. Reports can be uploaded in multiple forms (CSV or XML).
11. **Adapting:** The KELER TR system is available on business days from 8:30-until 18:00. During these operating hours, our help-desk's assistance is continuously available to support market players in meeting their reporting obligations.

12. **Offers optional testing:** offers an ongoing testing opportunity to clients in addition to the live system.
13. **Up to date:** KELER continuously monitors changes related to reporting obligations and informs its clients accordingly.
